Summary

Frontend Engineer with experience building multi-tenant B2B SaaS platforms using Next.js, TypeScript, and React. Comfortable owning a feature from architecture to shipping while working closely with backend, product, and design teams. Regularly integrates AI-assisted and agentic workflows into both the product and the day-to-day development process, with a mixed background in competitive programming and UI/UX design.

Experience

Frontend Engineer, GEN-TECH – Cairo, Egypt Feb 2025 – Present

- Act as a product engineer across multiple client platforms, multi-tenant B2B SaaS products, mobile app dashboards, and AI-enhanced BI tools, mostly owned frontend architecture end-to-end and using Next.js as a BFF layer alongside TypeScript and TanStack Query.
- Design and implement RBAC and multi-tenant access control systems, including route-level feature-gating, tailored to each product's role structure.
- Build and maintain a shared, reusable component library, data tables, multi-step onboarding wizards, cards, and forms, adopted as the standard across every client project.
- Partner directly with UI/UX designers to shape interaction patterns, and contribute to business analysis, translating client requirements into system-design decisions.
- Join client meetings regularly to gather requirements and validate solutions directly, bridging business needs and technical implementation.
- Collaborate closely with backend engineers on API design and integrate AI-driven features into client-facing products within an Agile team.

Coding Instructor, iSchool – Cairo, Egypt Aug 2024 – Sep 2024

- Taught coding and technology fundamentals (Python, Godot) to 4th–6th grade students as part of the DEMI summer program.
- Designed hands-on, project-based lessons that encouraged exploration and creative problem-solving.

Software Engineer Intern, Mogassam 3D – Cairo, Egypt Jul 2021 - Aug 2021

- Maintained and extended C++ application modules and wrote unit tests with Qt Test to ensure reliability.
- Applied linear algebra, trigonometry, and solid geometry to graphics-related module logic.

Education

Ain Shams University, BSc in Computer Science

- Led a student session on Git fundamentals and a practical session on database design (normalization, ER modeling, schema planning).
- Regularly mentor peers on database modeling, web development, and Unity projects.

Skills

Languages: TypeScript, JavaScript, Python, C++, Go

Frontend: React, Next.js, TanStack Query, TanStack Table, Zustand, nuqs, shadcn/ui, Tailwind CSS, Sass

Backend & Data: Node.js, MySQL

Practices: RBAC & multi-tenant architecture, Git, Agile/Scrum, AI-assisted & agentic development

Certificates

ECPC Finalist: [ICPC Profile](#)

Aug 2024
